
GRIPflow REPORT

Bulletin 22

Published by EBway
"Others may catch on, but they will never catch up"

It's a whole new way of stamping...

Reduce the costs... Stamp your sprockets to print tolerances!!!

PROBLEM: You want a sprocket that has the tolerances and features of a machined part. You want the cost reduced. You want higher strength than a powdered metal part. You want...

SOLUTION: Contact EBway LLC. With our innovative tooling and GRIPflow concept we are able to give you the quality and cost you have always looked for and, until now, were never able to find. Our stamped sprockets have tight-toleranced, smooth, straight-edges and a coined chamfer on each side of the teeth!

Part: Timing Gear Sprocket
Material: SAE 1050 Steel
Thickness: 0.297 Inches (7.5 mm)
